SUMMARY

I am a full stack developer with over 5 years of experience. I have developed and maintained complex Web and RESTful applications using PHP, Laravel, MySQL, and JavaScript along with various other technologies. Most of the projects I've implemented most common design patterns with Twitter Bootstrap, SASS and webpack2.

I always love working with a technically strong team where I can solve complex problems with a good balance of freedom and responsibility. and ability to learn new technology within a short period.

EXPERIENCE
